EDUCATION

Bachelor of Computer Science, Sheridan College

2023 – 2027

PROJECTS

JWT Authentication Back-End (Go). Built a user authentication REST API with refresh JWT support. Wrote and published a tutorial article. ([Read here](#))

PA Formatter (Python). Developed an internal tool at TransPerfect to automate Excel-based translation data processing with drag-and-drop GUI, automated pricing, and dual outputs (Excel for review, CSV for invoicing).

M.E.K. Restaurant Website (Typescript). Built a production-grade website for the largest breakfast restaurant in my hometown. ([Visit here](#))

Regex Engine (Java). Implemented a regular expression engine that compiles to bytecode and runs on a custom lightweight VM.

Cherry Compiler (C++). Designed a high-level programming language compiler with a hand-written lexer, recursive descent parser, and custom mid-IR that lowers to LLVM.

Chip-8 Emulator (C++). Implemented a fully functional Chip-8 emulator with opcode decoding, memory management, input handling, and rendering.

EXTRA-CURRICULAR ACTIVITIES

- **Student Researcher:** Lead the research of a supervised paper on LLM-IoT under Prof. Mouhamed Abdulla.

LEADERSHIP

- **Google Developer Group, Sheridan**
 - **Hackathon Lead, Workshop Member**
 - * Lead the planning, coordination, and execution of GDG hackathons
 - * Hosted a live workshop on the Fundamentals of Language Processing for 25+ students
- **Sheridan Computer Science Club**
 - **Lead Developer (Honeypot)**
 - * Lead a development team to create a hackathon back-end server (authentication, registration, event management) and a headless React UI library to power three major MLH hackathons

EXPERIENCE

Sales Intern
TransPerfect

June 2025 – August 2025
Toronto, ON

- Managed and grew enterprise accounts for global clients, including Visa, JP Morgan, and Bell Canada
- Oversaw quoting, client communication, transactions, and logistics for translation projects
- Drafted contracts, researched leads, and created tailored sales pitches

SKILLS

Programming Languages: C++, Typescript, Java, Python

Technical Skills: Compiler Design, Research, Systems Programming
